

SPECTRA LUNE

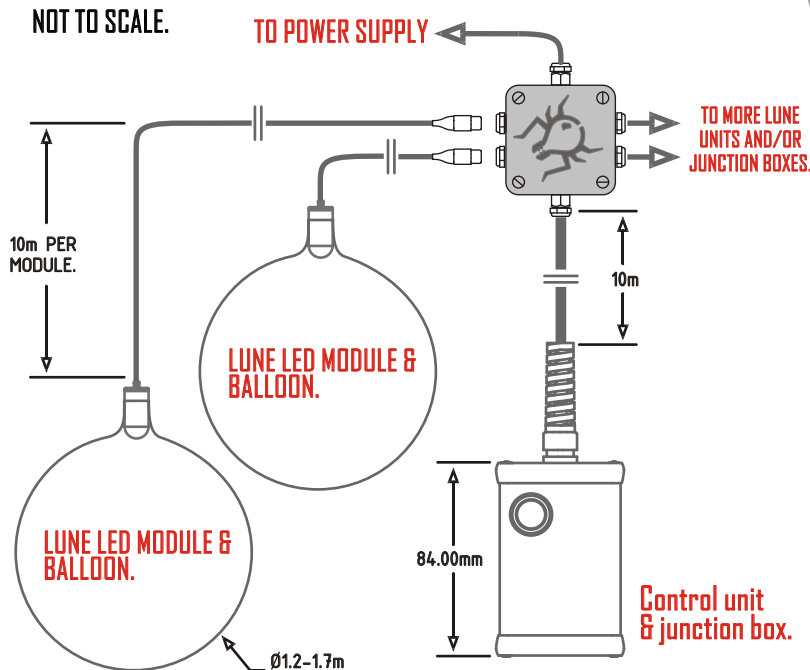

Unique colour changing lighting :

Eco friendly, bio-degradeable giant latex weather balloons combined with a tailor-made lightweight & energy efficient SPECTRA LED light engine.

SPECTRA LUNE FEATURES :

- * Long lasting, eco-friendly, giant latex balloon lights.
- * Low voltage, IP64 modules ideal for remote outdoor use.
- * Colour change and output colour mode controller.
- * Replaceable helium or air fill balloons with printing options.
- * Easy 'plug & play' connection.
- * Low power consumption.
- * Maintenance free 100,000 hour LED runtime.
- * Made in England following stringent environmental policies.

LONG LASTING & ECO-FRIENDLY REPLACEABLE LATEX BALLOONS.

FULL COLOUR IP64 LED MODULES.

SPECTRA LUNE SPECIFICATIONS :

OPTICAL :

Illumination Type : 36 x ultra-bright RGB LED cluster.

ELECTRICAL :

Power source : 12-24VDC. Mains power adapters supplied with control & junction box units.

Power consumption : 4.2W per module.

Runtime : LED's rated at 100,000 hours.

Control : Colour change speed, colour selector and white mode selected via the Spectra Lune control unit.

Switch rating : N/A

Cable : Resistant polyurethane. Length : 10m per module. Extension leads also available.

MECHANICAL - modules :

Material : 6063-T6 aluminium alloy.

Finish : Aluminum, silver anodised to AA25.

Weight : 0.25Kg.

Environment / IP Rating : Wet / splash resistant IP64.

MECHANICAL - balloons :

Material : helium-weight quality, 100% natural, biodegradable latex.

Size/capacity : 1.7m (inflated diameter) / 1.868m³ (gas capacity)

Flying time : Air filled = 4-6 months indoors / 2-3 weeks outdoors. Helium Filled = 8 days.

NOTE: The listed average inflation size & flying time are conservative averages. Actual flying times vary depending on temperature and atmospheric conditions.
